

Put Your Panels to Work for You.

You know installing solar panels is a great way to save money. And with Ambit’s Total Solar Buyback plan, you can get paid for the energy you generate! Here’s how it works. You’ll earn rollover credits whenever your panels produce more energy that your home uses. You can even offset up to 100% of your energy charges every month depending on how much energy your system generates and how much energy your home uses for things like cooling, heating, lighting and appliances. Best of all, it happens automatically, because we apply your rollover credits to future energy bills as long as you’re on an eligible Ambit Solar Buyback plan.

You’ll not only maximize your solar energy investment, you’ll also enjoy all the other great advantages of being an Ambit Customer, including our award-winning Customer Care, same-day service, hassle-free switching, the opportunity to earn Free Energy and our T.L.C. Guarantee – if you find your plan isn’t the right fit, you can switch to a different Ambit term plan within your first 12 months of service with no termination fee.

To learn more about why Total Solar Buyback is such a bright idea, talk to your Ambit Independent Consultant.
